**COMMENTS TO AUTHORS**

The authors present a summury article of surgery strategies for spinal cord injuries. There is less new information regarding spinal cord injuries in general, but this topic is a remaining problem of surgery even in our days. The review is well written, please add a abbreviation index or explain abbreviation after first mentioning.

**COMMENTS TO AUTHORS**

This is a review of current and future surgery strategies for spinal cord injuries. This review is a splendid review summarized properly. However, I am worried about there is no quotation of the recent thesis after 2010. This region is to be delayed if there are few theses. If there is comment in such a reality, please add a postscript.
