COMMENTS TO AUTHORS

This is an interesting review article. Here are some comments: Abstract: In my opinion the abstract can be somehow expanded to include some info regarding the aim of the review and the main points (for example indications, results etc). Introduction: Again, at the last paragraph please include the aim of this review, some info regarding the methodology (literature review? , personal experience?). Surgical technique: "- All the portals are made with the "nick and spread" technique" Please expand to explain. Also, please add reference for the figures within the text. (figure 1a etc). Discussion: Please include published studies with the so far results of this surgical method.
