COMMENTS TO AUTHORS

The manuscript entitled "neuromuscular scoliosis and pelvic fixation in 2015: where do we stand? by Anari et al provides an insight into the time-line and development of treatments of neuromuscular scoliosis. This is a well written editorial and should interest many scientists in this field as to the progression of treatment of neuromuscular scoliosis, and also how treatment can progress from the current standards of care. I have no recommendation other than to publish without revision.
