COMMENTS TO AUTHORS

Comments to Authors The submitted manuscript, entitled "Depression and Psychiatric Disease Associated with Outcomes after Anterior Cruciate Ligament Reconstruction" is attempting to delineate potential relationships between depression and ACLR outcome, discuss clinical implications and identify future directions for research. The Title: is referring directly to the problem at hand. Abstract: [a synopsis of the main points of a manuscript – the abstract includes; purpose, material and methods, discussion, results and conclusions]. The present abstract does not possess the above structure. Introduction: is concise and helpful to understand the problem at hand. The following subchapters, represents material and methods, results and discussion. Depression Symptomatology and Anterior Cruciate Ligament Reconstruction. Recovery from ACLR: A Lengthy Rehab Process. The Mechanism of Depression and Implications for Recovery. Other Psychiatric Disease and ACLR. Recommendations for Clinical Practice: Evaluation of ACLR Candidate. Recommendations for Future Research. Material of the study are disused between the above various sub-chapters or are completely omitted. Conclusion. Tables: 4 tables are included
