		<input type="checkbox"/> The same title	
		<input type="checkbox"/> Duplicate publication	
		<input type="checkbox"/> Plagiarism	
		<input checked="" type="checkbox"/> No	

COMMENTS TO AUTHORS

1. Throughout the paper it mentions that there were 19 patients, but in the results section the authors mention: Twelve patients were right handed and one described himself as ambidextrous. 2. Other limitations of the study would be: 1. The small sample size. 2. No patients were compared with and without LARS. 3. If possible, update references to 2015.
