COMMENTS TO AUTHORS

I have conducted detailed review of the manuscript. The review focuse on the therapeutic potentials of mesenchymal stem cells for therapeutic strategy of knee OA using either autogenous or allogenic cells This review would be much better if you elaborate the specific mechanism of MSCs' effection in the treatment of OA.

COMMENTS TO AUTHORS

This is an interesting article. However, the manuscript contains some grammatical errors and conceptual questions, which require attention. Suggestions: 1. Grammar This manuscript contains certain level of scientific merit and it is clearly written. However, the manuscript has quite a number of misused and redundant sentences as well as grammatical errors. I would suggest that the authors find some help in English edition.

COMMENTS TO AUTHORS

1. How the effect on early, middle and late osteoarthritis by mesenchymal stem cells? 2. Whether there were reports on the effect of degeneration in the late posterior neonatal cartilage? 3. Whether there were test reports of newborn cartilage biomechanical?
