COMMENTS TO AUTHORS

In the era of biologic therapies, it is very important, besides the efficacy of treatment, to take care of every co-morbidity of psoriasis. The associated diseases could influence both the progression of psoriasis, but also choosing of treatment. This review is very useful for every dermatologist in hospitals and out-clinic. Minor language errors to review. The references should correspond to text (numbers).

COMMENTS TO AUTHORS

This is an interesting and clinically relevant review on the use of biologic drugs (anti-TNF-alpha and anti-I12/23 agents) in the treatment of psoriasis patients with liver disease (viral and non-viral). The manuscript is well-written, and the literature review is detailed.

COMMENTS TO AUTHORS

I have read with great attention and interest this manuscript which reviews the treatment of psoriasis with biological agents regarding the potential hepatotoxicity. I have found this manuscript very worthy for dermatologists and with a great clinical value. Language is correct and references are recent. This manuscript deserves publication due to the interesting topic addressed and the great reviewing work performed by authors.

COMMENTS TO AUTHORS

your manuscript is marvelous, you described liver disease and use of biologicals in a perfect style. but some points need some revision: your abstract is a bit long, please shorten it. your references had not been written in the same format, please do it.
