COMMENTS TO AUTHORS

It is an interesting case presented, as long as there are only a few reported with zosteriform distribution. To see also the reports from 2013 with the capsicum topical treatment and 2007 with doxazosin per os. - Arfan-ul-Bari1Zosteriform cutaneous leiomyoma: a rare cutaneous neoplasm. J Coll Physicians Surg Pak. 2013 Aug;23(8):586-7. doi: 08.2013/JCPSP.586587. - Chaves AJ1, Fernández-Recio JM, de Argila D, Rodríguez-Nevado I, Catalina M. [Zosteriform cutaneous leiomyoma. Satisfactory treatment with oral doxazosin]. Actas Dermosifiliogr. 2007 Sep;98(7):494-6.

COMMENTS TO AUTHORS

Interesting case and well written The case is not really that rare The quality of the clinical and histological images is a bit of a concern. Do the authors have alternate images? What was the response to nifedipine in this patient? What exactly is the 'bystander effect' phenomena? Was worsening of pain with cold elicited?
