<input type="checkbox"/> Grade D (Fair)		BPG Search:	<input type="checkbox"/> Minor revision
<input type="checkbox"/> Grade E (Poor)	<input type="checkbox"/> Grade D: rejected	<input type="checkbox"/> Existed	<input type="checkbox"/> Major revision
		<input type="checkbox"/> No records	

## COMMENTS TO AUTHORS

This descriptive case report outlines a clinical case of low-grade malignant triton tumor with unusual location and distinctive mature skeletal muscle differentiation. This Reviewer suggests that the inclusion of the measurements of the other myogenic regulatory factors (MRFs) would provide further information about the skeletal muscle component. In addition, this Reviewer suggests to include more discussion on the negative immunostaining results of Myogenin and MyoD.

## COMMENTS TO AUTHORS

This is a nice case report of a rare low-grade sarcoma in the extradural region of C2-C4. The manuscript is well written and the Figures are clear. The only comment is that it would be interesting to present data of the general medical examination, the medical history and current medication of this patient.
