COMMENTS TO AUTHORS

The present manuscript submitted by Canning and Moawad reviewed the "Center of Excellence" concept for minimally invasive gynecologic surgery. It is well written and interesting. I believe that the manuscript is acceptable for publication in its present form.

COMMENTS TO AUTHORS

Comments: The authors introduced COEMIG with its potential benefits and challenges for the patients, the applicant institution and surgeons. This manuscript is informative for the clinicians and researchers in this field, therefore is acceptable for publication. That is all.

COMMENTS TO AUTHORS

I think the present manuscript is useful to diffuse the concept of the need for a standardized model to evaluate the activity quality of the different centres with a continuous monitorization for the results. The manuscript is clear and consistent with the declared aim. I think it can be published in its current form.
