COMMENTS TO AUTHORS

This review article, though a little too long, has a scientific value to be published in the WJOG.

COMMENTS TO AUTHORS

Comments: The authors reviewed the ongoing research on pioneering drug candidates for the overactive bladder. This manuscript provides useful information to the medical students, clinicians, and researchers in this field, therefore, is acceptable for publication in World Journal of Obstetrics and Gynecology. That is all.

COMMENTS TO AUTHORS

I would like to congratulate the Authors with the “ big job” trying to summarize the possible today treatment for overactive bladder syndrome. But, reading this article, I have a feeling alike I am checking “pharmacologic catalog”. This is a review. Usually a review has specific “writing design”: how did you revise the literature, how did you found out what “is good” what “is wrong”, why have you decided that this is the best and etc. What we expect from review, we expect not only “record” but the analysis and conclusion as well. I suppose, you have to shortening this article and summarize what do think today is the best and what do you would like to suggest for the readers.

COMMENTS TO AUTHORS

Thank you for your great work. The paper is too long and needs to be shortened in some sections. There are also 312 references and not all of them are required to be cited. The authors need to remove some unnecessary references.
