COMMENTS TO AUTHORS

Comments: The authors reviewed the literature in order to identify management guidelines for middle-aged women affected by cervical embryonal rhabdomyosarcoma. Long-term survival was observed in patients receiving multimodal treatments. The authors claimed that the collaboration in multiple institutes is necessary to determine optimal management for this rare disease. This manuscript provides useful information to the medical students, clinicians, and researchers in this field, therefore, is acceptable for publication in World Journal of Obstetrics and Gynecology. That is all.
