SPECIFIC COMMENTS TO AUTHORS

Manuscript ID: 83399 Manuscript Title: Post-COVID-19 persistent olfactory, gustatory and trigeminal chemosensory disorders: Definitions, mechanisms and potential treatments
The review is well written and covers interesting subjects. Much information is already well known, but the review manages to tie the information together in a way that explains some of the lags about persistence in post-COVID-19 anosmia and ageusia and, the figures greatly aid understanding. In order to contribute to the improvement of the manuscript, some suggestions are proposed. 1. Please note that the manuscript must be prepared using 12 pt Book Antiqua font and 1.5 line spacing with ample margins according to the WJO guideline; 2. There are a few typing errors: susentacular cells... Best regards

SPECIFIC COMMENTS TO AUTHORS

This is a satisfactory review with no major problems. There are a few formatting issues with spacing between letters and I am seeing vertical red lines running down some pages; this needs to be corrected in copy editing.
