## COMMENTS TO AUTHORS

This is a well-written short paper describing a current status of Meniere's disease, which is worthy of publication after minor revision. Regarding the following points, citation of relevant papers are necessary. 1. Visualization of endolymphatic hydrops: Nakashima and Naganawa groups 2. Effects of endolymphatic sac surgery, i.e., better hearing outcome and prevention of bilateral MD: Tadashi Kitahara et al. 3. Effects of GM therapy: many review papers are available 4. Comorbidities of psychiatric conditions and a role of treatment for psychiatric diseases using SSRIs: Arata Horii et al.
