## COMMENTS TO AUTHORS

well written and with good grammar. Can you also define some issues: 1- state in the introduction why you decided to present a series of patients treated with Holmium:Yag laser rather than the largely used CO2. 2- please refer to the subtypes of HPV viruses that are more common in SCC 3- you don't tell anything about your findings in the 84 months follow up! it is more substantial to refer to a good follow up rather than the Ho Yag laser advantages!

## COMMENTS TO AUTHORS

I read the manuscript named "Use of Ho:Yag Laser in early stage oropharyngeal squamous cell cancer". (ESPS Manuscript No:23562) and my recommendations are as follows; This study is well written on use of laser in the Head and Neck cancers. Title : It is accurately reflects the contents of the study. Abstract: Adequate, summarizing the topic. Discussion: Adequate. References: References are appropriate and updated. This study is clearly presented. This manuscript is readable and worth to be published in World Journal of Otorhinolaryngology.
