COMMENTS TO AUTHORS

In this manuscript, the authors provide an extensive review of the recent advances in our understanding of the molecular pathology of COPD. The manuscript is timely and well written, easy to understand and deserves rapid publication. Presentation of literature data and illustrations are clear and data are summarized in pertinent tables. I only suggest to add some more information regarding COPD-specific miRNAs signatures and to stress how some of the discussed biomarkers could be introduced (and if could be introduced) into clinical practice.

COMMENTS TO AUTHORS

Your paper would benefit from many more commas. I have enclosed other suggestions. That said, it is a good review.

COMMENTS TO AUTHORS

It is a very interesting and excellent study.
