COMMENTS TO AUTHORS

This manuscript has reviewed the related articles and made a comprehensive introduction on definition, etiology and treatment of premenstrual asthma. Though lack of constructive conclusions, it will result in more attention on this disease.

COMMENTS TO AUTHORS

This is a very well-written review on a timely issue related to the field of respirology. References are relevant, updated and useful and analysis of the main issues for future investigation is clear and objective. Overall, I think this will be of interest to physicians and scientists working in the field of asthma, as well as on those interested in hormone interactions with immune factors.
