SPECIFIC COMMENTS TO AUTHORS

The title reflects the main subject of the manuscript. The summary reflects the work properly. The keywords reflect the focus of the manuscript well. The manuscript adequately describes the history and the importance of the study. The manuscript describes the experiments and data analysis in detail. The research objectives are achieved by the experiments used in this study. The manuscript properly interprets the findings, highlighting the key points in a clear and logical way. This subject is not new, but although there is nothing new, it is important to keep showing that human milk continue to be the best for babies. The manuscript adequately cites the most recent, important and reliable references in the introduction and discussion sections. The manuscript is well written, concise, and coherently organized.
