SPECIFIC COMMENTS TO AUTHORS

Authors need to check the manuscript for language. eg : "This letter to editor discussing on the publication on adipocytokine profile in children with Kawasaki disease"
"Basically, the underlying genetic factor can also play role."

SPECIFIC COMMENTS TO AUTHORS

This is an interesting study. At present, the pathogenesis of Kawasaki disease is still unknown, especially the high risk factors of Kawasaki disease complicated with coronary artery injury. Whether abnormal lipid metabolism exists in children with Kawasaki disease and its role in the occurrence and development of Kawasaki disease are one of the hot spots in current research. This study has certain clinical value in finding possible biomarkers of Kawasaki disease from the perspective of lipid metabolism.
