SPECIFIC COMMENTS TO AUTHORS

The article is within the scope of the magazine, and deals with an interesting topic. It is well written and easy to read. The work carries out a review on pediatric patients with IBD. This is a novel and original work, which represents a great contribution by grouping works related to the area. However, it requires some improvements: a) A section that contextualizes the topic of the review should be included. b) It should be explained how the bibliographic review has been carried out: search and recovery criteria, databases used, time range... c) A discussion section should be included in which the articles and lines of work found are compared, and the limitations they present and what the lines of future work would be are shown.
