COMMENTS TO AUTHORS

The paper describes the relationship between preoperative BMI and long-term outcome. The results are very interesting, showing a substantially decreased overall survival in the underweight group. What were the causes of death? Separate analysis of cancer-specific survival would improve the manuscript. Unfortunately, the authors have submitted a manuscript that is not yet completely edited. The reference list is lacking and there are still comments and corrections in the word document. Minor comment: On page 5, paragraph 3, the unit for albumin is missing.
