Peer-reviewer statements	Peer-Review: <input checked="" type="checkbox"/> Anonymous <input type="checkbox"/> Onymous Conflicts-of-Interest: <input type="checkbox"/> Yes <input checked="" type="checkbox"/> No

SPECIFIC COMMENTS TO AUTHORS

At present, the epidemiological characteristics of urinary system injury in sub Saharan region are relatively blank. Through literature review and analysis, the author collected data as much as possible and summarized the epidemiology and characteristics of urinary system injury in this region, which is very helpful for us to understand the characteristics of urinary system injury in this area. Although the situation in this region is complex, and some regional differences may be large, the overall data is of reference significance, and it is suggested that the language should be revised for publication.
