## PEER-REVIEW REPORT

**Name of journal:** *World Journal of Critical Care Medicine*

**Manuscript NO:** 89026

**Title:** Expert consensus on use of extracorporeal hemoabsorption in septic shock: An Indian perspective

**Provenance and peer review:** Unsolicited Manuscript; Externally peer reviewed

**Peer-review model:** Single blind

**Reviewer's code:** 01548565

**Position:** Editorial Board

**Academic degree:** PhD

**Professional title:** Chief Physician, Director

**Reviewer's Country/Territory:** China

**Author's Country/Territory:** India

**Manuscript submission date:** 2023-10-18

**Reviewer chosen by:** Yu-Lu Chen

**Reviewer accepted review:** 2023-11-16 23:55

**Reviewer performed review:** 2023-11-20 08:45

**Review time:** 3 Days and 8 Hours

## SPECIFIC COMMENTS TO AUTHORS

Extracorporeal hemo-adsorption has been shown promising outcome in sepsis. However, there is a lack of some guidance to make clinical decisions on the use of hemo-adsorption as an adjuvant therapy in sepsis. First, this Indian consensus provides statements on the use of hemo-adsorption as an adjuvant therapy in patients with sepsis. This expert consensus statements provides general physicians, emergency care physicians, anaesthetist, and intensivists with current information regarding the use of haemo-adsorption as an adjuvant treatment in patients with refractory septic shock. Second, the manuscript well, concisely, and coherently organized and presented, This Indian perspective consensus statement supports use of hemo-adsorption as an adjuvant treatment in patients with septic shock and provides guidance to achieve better outcomes. Third, It may also contribute in the optimization of refractory septic shock treatment in India.
