## ESPS PEER-REVIEW REPORT

**Name of journal:** World Journal of Experimental Medicine

**ESPS manuscript NO:** 22384

**Title:** MicroRNA-regulated viral vectors for gene therapy

**Reviewer's code:** 00291404

**Reviewer's country:** United States

**Science editor:** Jin-Xin Kong

**Date sent for review:** 2015-08-31 17:13

**Date reviewed:** 2015-09-11 04:03

		<input type="checkbox"/> The same title	
		<input type="checkbox"/> Duplicate publication	
		<input type="checkbox"/> Plagiarism	
		<input checked="" type="checkbox"/> No	

### COMMENTS TO AUTHORS

The authors have done a great job in summarizing the work done in the relevant fields, and provide guidance for future applications of this cutting edge technique in gene therapy and other relevant studies. The article was well-written. This review should be very useful to both experts and newbies alike. Minor issues: 1. The two sections on pages 19-20. Why does the section "other applications" go before "Oncovirotherapy and vaccines"? It seems that it should be the other way around. 2. I have noticed that in references from the journal Science (e.g., ref #35, 40, 42, 49), there was "(80-)" right after the name of the journal. If it is not meaningful, please delete it. 3. Ref #62. Information updated: 25:209-218.
