

PEER-REVIEW REPORT

Name of journal: *World Journal of Psychiatry*

Manuscript NO: 85219

Title: Global research trends and mapping knowledge structure of depression in dialysis patients

Provenance and peer review: Invited manuscript; Externally peer reviewed

Peer-review model: Single blind

Reviewer's code: 05789838

Position: Editorial Board

Academic degree: PhD

Professional title: Associate Professor

Reviewer's Country/Territory: China

Author's Country/Territory: Palestine

Manuscript submission date: 2023-04-17

Reviewer chosen by: Geng-Long Liu

Reviewer accepted review: 2023-05-18 06:15

Reviewer performed review: 2023-05-24 16:17

SPECIFIC COMMENTS TO AUTHORS

The purpose of this study is to examine the evolution and growth of publications related to dialysis and depression. The objectives are to determine the quantity of publications, the most active countries, funding and sponsoring institutions, and journals, as well as to conduct citation and research topic analysis. Overall, I believe this paper holds significant value. However, considering the inherent limitations of bibliometric studies, I suggest that the authors make the following modifications: 1. The authors should pay more attention to the analysis and clustering of different keywords. It is important to explore the associations between each keyword and other related keywords, which requires further analysis. 2. From the perspective of bibliometrics, the paper should provide a more in-depth analysis on how to reflect the future research directions. These revisions will enhance the quality and impact of the paper.

SPECIFIC COMMENTS TO AUTHORS

While the article provides a comprehensive overview of the current state of research on dialysis and depression, there are several areas where it could be improved. Firstly, the article could benefit from a more detailed explanation of the methodology used to conduct the study. While the authors briefly mention that they used Scopus as the target database and VOSviewer software to create network maps, they do not provide a detailed explanation of how they selected the publications to include in the study or how they analyzed the data. Secondly, the article could benefit from a more critical evaluation of the limitations of bibliometric and visualization mapping. While these methods can be useful for identifying research trends and knowledge gaps, they are not without limitations, such as the potential for bias in the selection of publications and the inability to capture the full complexity of research topics. Finally, the article could benefit from a more detailed discussion of the implications of the study's findings for future research on dialysis and depression.
