COMMENTS TO AUTHORS

The authors reviewed epidemiology and pathophysiology of vascular cognitive impairment (VCI) and discussed preventive and therapeutic methods. It is a very good review. I have a couple of suggestions for improving the quality of the manuscript. 1. The authors should explain how many types of VCI and their similarities and differences. 2. The authors should add tables to summarize the different investigations of VCI as well as the therapeutic trials. 3. There are many typos need to be corrected.

COMMENTS TO AUTHORS

it is a useful review on all aspects of vascular dementia. English is not my native language - but it seems to me that some minor language polishing is required. Otherwise, I have no comments.
