COMMENTS TO AUTHORS

A very valuable and comprehensive description of Catatonia. It will add to our understanding and contribute to a correct diagnose and treatment of the syndrome. I have only discovered one language fault - page 5, line 7. There should be an "of" in the sentence "the presence other catatonic signs"

COMMENTS TO AUTHORS

The Manuscript entitled "A Retrospective Study of Prenatal, Childhood and Adolescent Drug Exposure in Schizophrenia" is well-written and comprehensive, in this reviewer's view an excellent piece of work. Only on minor remark: p4 it must read DSM-5 Congrats and thanks.
