SPECIFIC COMMENTS TO AUTHORS

In this article, the authors present some rare brain tumors and the risk of recurrence/metastasis. The subject is of interest. I have some questions/concerns as below

1. If I understand correctly, in this article the authors present the numbers of patients with distant metastasis with these rare brain tumors- who were not organ donors.... So, I am not sure if this article fits the scope of the Transplant journal or should better fit the oncology journal?
2. Are there any data of donor-derived transfer of brain tumors mentioned in this article?
3. What was the aim of the study and recommendations from the authors?
4. The range of metastasis ranged from 0-276 months, that is 0-27 years, so it is so vague to make any conclusion if organs from pts with these tumors should be accepted or not.
