SPECIFIC COMMENTS TO AUTHORS

There are several major concerns for addressing: 1. Section of RECURRENT NAFLD is better to be refined, since it is repetitive and long-winded. 2. EPIDEMIOLOGY section: Only several sentences have correlation with epidemiology. RECURRENT NAFLD section and DE NOVO NAFLD section should be included into EPIDEMIOLOGY section. 3. I do not think the structure and content are organized properly. This matter occur in many sections, such as EPIDEMIOLOGY, PROGNOSIS. Authors should carefully revised the relevant sections. 4. RISK FACTORS section: Several risk factors have been associated with post-LT NAFLD occurrence. These factors include common factors for all NAFLD, specific factors for post-LT NAFLD. Authors should simplify the common factors while focus on the specific factors. 5. For focus on post-LT NAFLD, it is better to remove DIAGNOSIS section. 6. MANAGEMENT section: Authors should simplify the common management while focus on the specific management for post-LT NAFLD.
