COMMENTS TO AUTHORS

Congratulations to the authors of the article, I would ask if they are thinking of new model of Meld, ex make a higher score for women would be the MELD-WOMAN (MELD-W)? Very interesting article

COMMENTS TO AUTHORS

In this manuscript, authors present a review on a role of gender in different etiology of liver disease, presentation at transplantation, access to transplantation resources, and outcome after liver transplantation. Overall, the review is extensive, accurate, and updated. However, the review would be better if it is shorter and some of language is polished a little bit.
