### COMMENTS TO AUTHORS

Sir, That is an interesting article on different forms of prophylaxis of Pneumocystis jiroveci infection in transplant recipients. My suggestion is to present not only the duration of classical prophylaxis but also some hints on the dosage in a core prophylaxis. with Trimethoprim sulfametaxazol. Data on pentamidine prophylaxis are interesting but remain still a matter of debate. For that reason my suggestion will be to change the title of the article Pneumocystis jiroveci Prophylaxis in Heart Transplant Recipients -focus on pentamidine. Additionally please correct multiple omission of spaces between words - it will be important for good reading. Best regards
