COMMENTS TO AUTHORS

This case report discusses an important issue in patients with kidney transplantation. The manuscript needs strongly to be reviewed by an English speaking editor since there are many typing errors and some grammatical defects.

COMMENTS TO AUTHORS

Dear Professor: Regarding the case report: Cavitary lung lesion 6 years after renal transplantation. It deserves publication after correcting statement in page 3 (revealed pancytopenia(Hb-7.4g/dl, total leucocyte count-3400/cu mm, platelet count-247000/cu mm)) because there is no pancytopenia (platelets are normal in count) Best Wishes Hussein Sheashaa
