COMMENTS TO AUTHORS

Author performed an excellent review about the topic. This reviewer has only two minor comments:

1. Page 5, last paragraph. Could author explain why this population has a high incidence of sensitization? 2. Page 7, second line. This reviewer recommends to use the words "plasma exchange" instead of "plasmapheresis", according to the last edition of the ASFA guidelines published in J Clin Apher 2013;28:145.

COMMENTS TO AUTHORS

I reviewed the manuscript entitled as "Antibody-mediated rejection after intestinal transplantation."

It is a mini review study which tries to discuss one of the current problems of small bowel transplantation. The manuscript is suitable to be published in the journal.
