COMMENTS TO AUTHORS

Page 15. "A recent study stated that clopidogrel had no on donor PLT function". I think that the correct phrase is "A recent study stated that clopidogrel had no effect on donor PLT function" Also, same page 15, phrase "Ticagrelor completely ADP mediated PLT activation in all assays tested" it is unclear. It should be clarified. Page 16. ISR (In Stent Reestenosis), this abbreviation should be clearly defined before using it in the text. Page 16. DCB abbreviation is not defined. Page 15. TLR abbreviation is not defined.

COMMENTS TO AUTHORS

The paper by dr. Dalal deals with the perioperative challenges in patients who undergo organ transplantation and have or should undergo in the postoperative phase coronary stent implant. The paper is well written and the topic is interesting. However, in the current format the communication of the important messages to the readership is not immediate. Therefore, I would suggest three tables in which the important messages of the paper are summarized, so that the text can be more slim and fluent. The first table can summarize the characteristics of the different types of stent, the second the characteristics of the antiplatelet drugs and the third the different methods to assess the efficacy of the antiplatelet therapy.
