COMMENTS TO AUTHORS

In this review article, the authors described the background, rationale, and clinical results of allogeneic hematopoietic stem cell transplantation (allo-HSCT) with reduced intensity conditioning (RIC) as an immune-based strategy via GvT effect for the treatment of some metastatic solid tumors, including renal cell carcinoma (RCC), metastatic colorectal cancer (mCRC) and ovarian cancer. This is an interesting review article. This manuscript is well-written. The reviewer has no further comment for this manuscript.
