#### **SPECIFIC COMMENTS TO AUTHORS**

Dear author! In my opinion, your article should either include a discussion section or specify in more detail in the conclusion section your position on your review. In the table presented, it is probably necessary to add another column showing the outcomes (confirmed morphological changes in the liver tissue) found in each case you describe (viral circulation, hypoxia, drug exposure ...). So your material will be more clearly presented to the reader. Also describing the results of comparative studies (literature data 34-36) could you provide, in addition to percentage data, the results of the statistical significance of these findings, presented by the authors in the sources. So this data will be more revealing and understandable. With deep respect, prof. Sergey Alexander Gulyaev
