## SPECIFIC COMMENTS TO AUTHORS

The adverse reactions caused by SARS-COV2 vaccination are the focus of global attention. This paper reviews the existing evidence related to the rare adverse event of Secondary liver injury after SARS-COV2 vaccination, and attempts to clarify its potential mechanism through immune mediated pathway, so as to establish the causal relationship with SARS-COV2 vaccine and liver injury. It is of great significance to promote the update of vaccine technology and the prevention and treatment of related adverse reactions. 1. So far, how many cases of liver injury caused by SARS-COV2 vaccination have been reported? 2. Are there ethnic and regional differences in liver injury after SARS-COV2 vaccination? What is the reason for the different time of liver injury? 3. It is suggested that the relevant mechanisms should be explained with figures. 4. Do you have any good suggestions for vaccine formulations? 5. The sense of article hierarchy is slightly poor.
