## COMMENTS TO AUTHORS

The paper needs more in-depth details and needs more support from the literature. In addition, there should be more discussion over the cost and safety of the ART for HIV-1 discordant couples.

## COMMENTS TO AUTHORS

The topic of manuscript is significant and interesting, I strongly recommend it. Before publication, I have some suggestions as below: 1. Some part need to describe more detailed, especially the paragraph entitled "cost/benefit". Some solid and specific content is required. 2. Actually, situation of infected women and un-infected men couple is presented, thus, one part described this situation is needed. 3. Many sentences are difficult to read and understand, the English Editing is absolute required.
