SPECIFIC COMMENTS TO AUTHORS

1) A well written article, including two tables collecting most previous studies on the virus-renal cancer relationship; however, the studies in the tables should be ordered according to the year of publishing. 2) Conventional renal cell carcinoma is discussed clearly and sarcomatoid cancer also well-described in relation to the associated viruses, but collecting duct carcinoma (a rare variant with poor prognosis and challenging therapy) didnot clearly discussed however a relationship between the CDC and viruses, particularly, BK polyomavirus was reported in the literature, it would be better to add a brief of the CDC and the related virus, Useful article to be cited for CDC <https://doi.org/10.5489/cuaj.2932> <https://doi.org/10.1016/j.eucr.2020.101367> Useful articles for the relation between BK virus and CDC <https://doi.org/10.1016/j.ehpc.2016.10.003> <https://dx.doi.org/10.18632/Foncotarget.24552>
