COMMENTS TO AUTHORS

The authors reported that the normal baroreflex physiology, methods to assess baroreflex function, and the prognostic significance of assessing baroreflex sensitivity in chronic kidney disease patients in this review. This review is well written and important except for some minor concerns. (1) Table 2 is redundant, because the authors reported the contents closely in the manuscript. Therefore, the authors should delete Table 2. (2) There are no reference numbers in Table 3. The authors should add them in Table 3. (3) There are no abbreviations in Figure legends. The authors should add them in Figure legends.
