### COMMENTS TO AUTHORS

This review paper is well-written and provides recent information about percutaneous nephrolithotomy (PCNL) in children with renal stones. However, some points should be revised.

1. page 1, line 8: "mikro" should be changed to "micro".
2. page 3, line 20: What is "MPCNL"? Please provide a full spelling before first using an abbreviation.
3. Table 1, stone size: Did you provide the mean of stone sizes in each study except for Elderwy paper? If so, you should describe it in the table
