COMMENTS TO AUTHORS

The authors are requested to attend to the following queries that arose on reviewing the manuscript. In abstract, the conclusion states that "the present study suggest that the patients and medical practitioners need to be educated".Since the respondents were only patients, it is not appropriate to determine the lack of awareness among physicians without evaluating their response. Modify the keywords as per the MeSH database In methodology: Kindly elaborate the inclusion and exclusion criteria employed in this study. Mention that the institutional ethical clearance was obtained Was any kind of blinding performed? Any history of drug usage or other illnesses that may impact oral health? Can unemployment be considered a factor for not obtaining dental treatment? (the findings of the study shows a high rate of unemployment)

COMMENTS TO AUTHORS

The study needs minor modifications: Provide the total number of patients receiving dialysis in each facility Provide the information if visits to the dentist are free/covered by medical insurance? Dentate: is it the right word? Table 3: Check the rows
