COMMENTS TO AUTHORS

Article "Prevalence and outcome of acute kidney injury, as defined by the new KDIGO guideline in very low birth weight infants" by Masia Al Malla is according to my opinion, acceptable for publication after minor revisions. In this article authors presented their experience with acute kidney injury in the infants using. It is very interesting article with clinical implications. Major revisions: NONE Minor revisions : 1. Some minor grammar revisions. 2. In the Table 3 gestational age is not properly positioned.

COMMENTS TO AUTHORS

This is a very good manuscript facing with the new classification of AKI in infants according KDIGO. The manuscript has some limitations that the authors themselves recognize, however is well written and offer the reader useful information concerning a very difficult population. The manuscript is good to be published
