### COMMENTS

#### CONFIDENTIAL COMMENTS TO EDITOR:

This is an interesting and very well written article. In my opinion, it may be published with only minor changes.

#### COMMENTS TO AUTHORS:

Abstract: The authors point out in “Settings/Location” that “Departments of medicine and radiation oncology in two separate teaching hospitals”. As only one patient was included, could the authors better explain this statement? Introduction: The introduction section seems to be too long, and may be slightly shortened. Discussion: page 15: I would suggest better connecting the sentence “These make up the mucosal immuno-neuronal physiology that is indirectly affected by HPS on contact” with previous or latter paragraphs.
