COMMENTS TO AUTHORS

The manuscript by Lama et al 2013 entitled “translational medical mycology guides the clinic and laboratory practice on fungal infectious diseases” provides a review-style insight into the detection and treatment of fungal infections. The article is interesting and informative, and draws upon useful clinical cases to illustrate the passage of bedside to bench and bench to bedside. The article will require removal of typographical and grammatical errors, and also I would request that the authors define all abbreviations and acronyms. I would expect the article will interest many scientists and therefore recommend it for publication once these minor revisionary suggestions are dealt with.
