ESPS PEER-REVIEW REPORT

Name of journal: World Journal of Translational Medicine

ESPS manuscript NO: 13166

Title: Epigenetics and DNA methylation in cancer

Reviewer's code: 00541708

Reviewer's country: France

Science editor: Yue-Li Tian

Date sent for review: 2014-08-09 13:24

Date reviewed: 2014-09-30 18:17

COMMENTS TO AUTHORS

1. More primary references are needed. 2. I have specific comments in what I have uploaded. 3. The manuscript is long and many "the's" can be deleted without loss of meaning. I have done so in many places. 4. A few sentences are confusing. 5. Have you obtained permission to publish all the tables and figures? 6. I have taken the liberty of editing in a number of places, using more standard English.

COMMENTS TO AUTHORS

The review article entitled "Epigenetics and Methylation in Cancer" is not only well written, but also provides insights into tumor development. It is well-known that angiogenesis plays a central role in the progression of cancer. Therefore, it is important to include the role of DNA methylation in the initiation and progression of angiogenesis in cancer in this review.
