SPECIFIC COMMENTS TO AUTHORS

In this review, the authors want to discuss the telemedicine and its application in the management of IBD, including telemonitoring, teleconsulting, teleducation, telenursing, telenutrition, and telepathology. The content of this review is interesting and comprehensive. However, this review also has a few of shortcomings. 1. This review lacks a certain degree of innovation and creativity. In addition, similar reviews have been published. So it is suggested to explore a new perspective. 2. The logic of this review is not clear and language is not refined enough, it is suggested to add their own insights and condensed paragraph.

SPECIFIC COMMENTS TO AUTHORS

I read the paper by Gravina et al with interest. The authors summarized the primary evidence in the literature on telehealth and inflammatory bowel diseases. While there are some questions need to be solved before publishing: 1. Please point out the innovation part of this manuscript compared with the published reviews, like PMID: 34275304, PMID: 35323120, PMID: 37099723, PMID: 36926667. 2. The content about educating patients about IBD and its management (teleducation) need to be added in this review. 3. It would be better to discuss the limitations of telehealth for IBD in the end of this review.
