COMMENTS TO AUTHORS

Major points 1. This review is very well organized for H. pylori eradication. 2. I suggest that authors should add the review of eradication rates by the difference of PPIs in first line therapy part. Minor point I suggest that authors need to recheck this review for some spell mistakes. "H.pylori" should be changed to "H. pylori", and the name of bacteria need to be in italic. Also, there are many trouble of spaces, I suggest that authors need to re-check all sentences in this manuscript.

COMMENTS TO AUTHORS

This manuscript has been written in detail concerning about current Helicobacter pylori treatment regimens. My major critic is that many references you cited in the text are not related correspondingly. There are many discrepancies between your texts and references; such as page 3 reference 6, page 5 references 6 and 11, page 6 reference 6 and 7, page 7 reference 11, page 8 references 13 and 18. The reference 6 should be as follows: Helicobacter 2014; 19 (Suppl 1): 38-45.
