COMMENTS TO AUTHORS

-The abstract is extremely long; -Recurrent UTIs could be the complication of different condition (vesciocourethral reflux, lower urinary tract disfunction, anatomical anomalies..) some of the prophylaxis measures described in the manuscript are just listed without any focus on their specific indication, this makes weak the comparison between the different measures.

COMMENTS TO AUTHORS

Dear authors, It is a well written editorial on a subject that presents interest. In my opinion the abstract is too long. Best regards,
