COMMENTS TO AUTHORS

The title is interesting. Abstract is brief. Introduction explained the importance and the aim of the study. Material and method described the methods of investigation so it's easy to follow for other investigators. The discussion part compared the result in different region of the world and made conclusion. It needs English polishing.

COMMENTS TO AUTHORS

Antibiotic resistance is the toughest problem of H. pylori's eradication. It an interesting study for physicians. Minor revisions: 1, Table 2 seems too long, whether it has a problem of publishing. 2, How was the reliability of E-test, DDM and ADM in diferent studies. 3. How were the PP and ITT rates in diferent studies.

COMMENTS TO AUTHORS

Manuscript titled "Helicobacter pyloriresistance to antibiotics: A systematic review" aims to review previous research evidence about the rates of antimicrobial resistance in H. pylori isolates obtained from worldwide over the last 6 years in order to evaluate the trend in antimicrobials agents. Although the author provide all basic section of a systematic review, yet this paper needs major revision. In abstract, The aim of the present paper needs more specific expression. As a systematic review, whether the author searched related reearchs in Cochrane library and EMBASE? In Mehtods, the suthor mentioned "articles written in foreign languages were translated when essential". What foreign languages means? whether tha author searched paper with other language not english and translated? Whether the methodology quality of eighty-seven studies were evaluted was evaluated?
